INMODE

INTRODUCING THE BEST VERSION OF YOU.

Discover IgniteRF, InMode's new meticulously calibrated workstation designed to address your facial and body concerns with its multiple technologies. Utilizing clinically proven bipolar radiofrequency energy, IgniteRF precisely targets different tissue depths to provide highly efficacious treatments.

This innovative platform delivers natural-looking results providing you with a seamless experience.

**ADVANCED TECHNOLOGY.
ENHANCED TREATMENTS.
EXCEPTIONAL RESULTS.**

THE **RFAL** PORTFOLIO

All RadioFrequency Assisted Lipo-coagulation (RFAL) technologies are minimally invasive devices designed to deliver tissue contraction. Rest easy knowing that a single treatment provides natural-looking results.

BodyTite Turbo & BodyTite

These procedures deliver skin contraction in larger body areas.

FaceTite Turbo & FaceTite

Safely and effectively contract loose tissue in small body areas.

AccuTite

The smallest contraction handpiece, designed for the precise treatment of smaller, delicate areas.

IgniteRF offers the best-in-class technologies to provide the exceptional results you expect. Take control of your face, body, and self-confidence.

Look as incredible as you feel.
